Cytokine Release

Reliable ELISA ready-to-use from an Indian manufacturer. Fast deliveries, assured quality and competitive prices. Our ELISAs are validated and manufactured at our labs under strict quality control. When you buy a KRISHGEN ELISA you are assured of quality and support from a seven year old organization in the field of life sciences and a market leader in its areas. Each kit is QC tested and validated as per the validation data indicated in the kit inserts.

Our **TNF-alpha** is an indirect double antibody sandwich ELISA to give higher sensitivity and specificity. Higher sensitivity is achieved by our higher titer concentration and biotinylation of detection antibody used. Specificity is achieved by usage of monoclonal antibody.

KRISHGEN TNF alpha ELISA kit maybe used for accurate and precise measurement of human TNF- α protein levels from samples including serum, plasma, and supernatants from cell cultures.

Sensitivity: 4 pg/ml
Standard Curve Range: 4 - 500 pg/ml

Time Requirements:
3hours 45mins Incubation Time
15mins Washing/Aspiration Cycle Time

Try our ELISA today !!!

KRISHGEN CYTOKINE ELISA are today exported to over 15 countries worldwide including Europe and USA.

TNF alpha Protein Crystal Structure

Working on systemic inflammation.

Do you use TNF-alpha ELISA ?

Validation techniques used for our CYTOKINE ELISA include -

Sensitivity

Specificity

Spike & Recovery Rate

Inter-Assay Deviation

Intra-Assay Deviation

Wet and Dry Assay Data

Accelerated Shelf Life Studies

Hook - Curve Effect

Validated ELISA
