

# KRISHGEN BioSystems

## Wide Range

Endothelial Cells

Epithelial Cells

Fibroblasts

Follicle Dermal

Papilla Cells

Hepatocytes

Keratinocytes

Melanocytes

Osteoblasts

Preadipocytes

Skeletal Muscle

Smooth Muscle

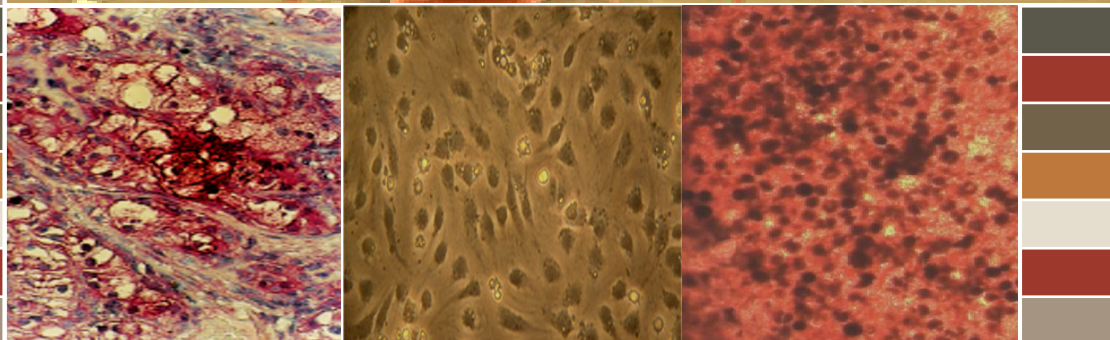

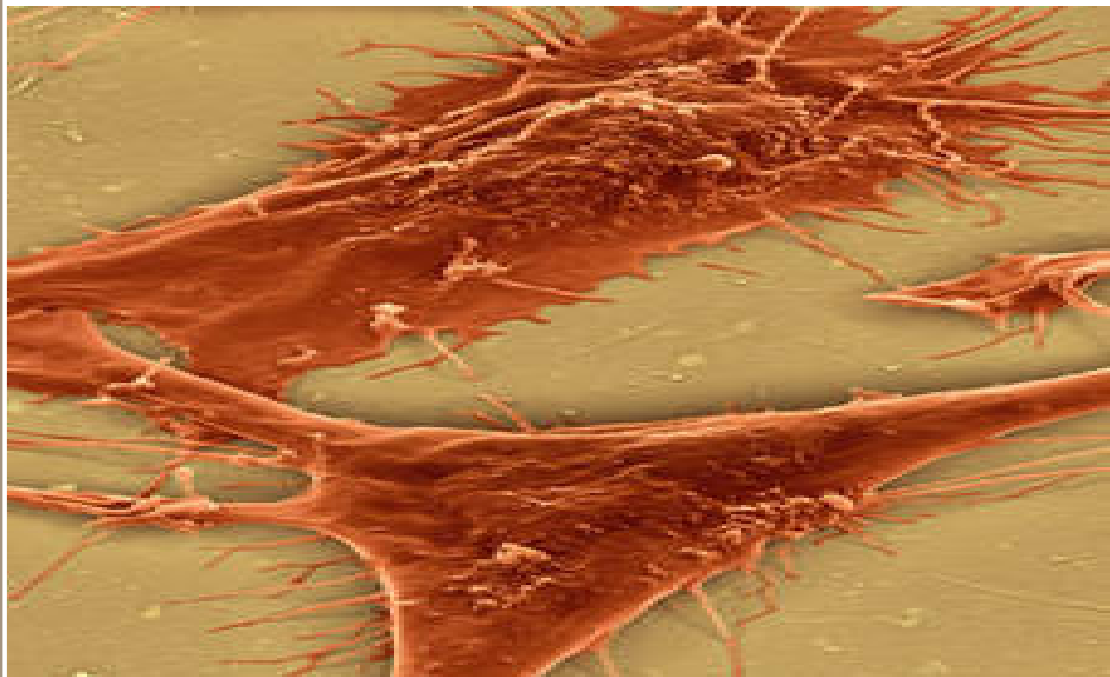

Chondrocytes

Cardiac Myocytes

## Promocell Primary Cells

All primary cells are available cryopreserved. Each cell lot is tested for cell type specific markers, cell morphology, population doubling time & proliferation capacity. In addition, tests for the absence of HIV 1, HIV 2, HBV, HCV, fungi, mycoplasma & other bacteria are performed. Each vial of cells comes with a detailed certificate of analysis.

PromoCell

## Our Science of Distribution

We know your cells are important to you. 90% of the times in selling primary cells to scientists, we have understood that logistics plays an important part in distributing cells. That is the reason why, we have invested in our own cryocans and also monitor the cells using our own specially manufactured temperature indicators.

## Why KRISHGEN ?

We are pioneers in India for primary human cells distribution having exclusively represented Cascade Biologics now Invitrogen Corporation in India for 4 years upto 2008. We now distribute Promocell GmbH, Germany.

## Cell Culture Experts !!!

PromoCell is a premier manufacturer of cell culture products and is especially recognized for its broad range of human primary cells, stem cells and blood cells, as well as optimized cell culture media. Scientists worldwide use PromoCell products in basic and applied biomedical research to obtain better results from more accurate physiological models.
