

KRISHGEN BioSystems

WE CARE FOR YOUR CELLS.

NO ONE KNOWS YOUR CELLS MORE THAN WE DO.

- We are in this business since 2004-2008 as exclusive distributors for Cascade Biologics now Invitrogen Corporation in India.
- We handle cells using our own latest liquid nitrogen vapor phase cryocans and also offer options of data logging using our own dataloggers.
- We use our own people to deliver the cells to ensure time in logistics is minimized.
- Our efforts are there to monitor 24x7, your cells from the moment they leave the manufacturer to you. We replenish the cryoboxes with dry ice; as and when needed.
- We understand the special needs in handling these products and the efforts required.

Talk to us; our experience in handling primary cells for the past 5 years will ensure a trouble-free working for you.
